Machine handles

Series MG-x-T2

The machine handles **MG-x-T2** are made of natural-colored anodized aluminum and the handle legs are made of powder-coated aluminium. The profile was specially designed to integrate additional functions in the installation of electronic assemblies.

The MG-x-T2 series is equipped with two integrated electronic buttons with short-circuit-proof output drivers and a green feedback LED. Contactors can be operated with the integrated semiconductor power drivers without a coupling relay. The buttons are debounced via software and have a minimum duty cycle of 200 ms. The connection to the power voltage (24 V DC) is made via a 5 m cable with an M8 connector or with an open end.

The machine handles are available in different lengths and switching functions (switches or buttons).

TECHNICAL DATA

- Operating voltage 21-27 V DC
- Operating temperature max. 50° C
- Fastening via 2x cylinder screws, hexagonal socket M8 x 55 / DIN ISO 4762
- Integrated overcurrent protection
- Integrated reverse polarity protection
- Two outputs 0.8 A / short-circuit proof
- Controllable green signalling LED button "ON".
- IP 65 protection class
- Available with switch / button function
