SMART-TERMINAL

THE NEW SOPHISTICATED ALUMINIUM PROFILE
ENCLOSURE FOR CENTRAL CONTROL UNITS

2

Materials and colours:

- Aluminium profile
AlMgSi 0,5 matt anodised
- Plastic parts
ASA+PC-FR, UV resistant, colour lava
- Designer seals
- TPV material, colours green or volcano grey

SMART-TERMINAL

Our new SMART-TERMINAL aluminium profile enclosures feature a highly quality matt anodised finish. These robust, elegant and highly attractive cases offer plenty of space for large-volume electronic assemblies, for example touch screens, display modules, PCBs etc. A variety of technical advantages, individual profile lengths on request, and creative designer options make the SMART-TERMINAL the last word in excellence for tough industrial display enclosures.

The new SMART-TERMINAL can be modified or finished individually to meet your requirements. Why not ask us! We are happy to assist you at any time.

*Designer seals and side covers

Three basic enclosures with profile lengths 160, 200 and 240 mm (overall length with covers +42 mm), enclosure width 170 mm. Designer seals available in green or volcano grey. Individual profile lengths to customer specifications on demand.

Designer seals moulded in TPV material in volcano grey or green. Provide a visual highlight for these new table-top, sloping front and wall mount enclosures.

Covers in lava (similar to anthracite) moulded in high-quality ASA+PC-FR plastic.

Two options for PCB mounting: horizontal guides in the top profile and screw channels in the top profile.

Flat areas for easy installation of the interfaces . Recessed areas in the side covers protect the cables and connectors.

The SMART-TERMINAL as an embedded PC. With individual profile lengths, the sides can also be closed with matching aluminium panels (accessories).

Applications:

- Peripheral and interface equipment
- Office
- Communications technology
- Safety engineering
- Biometrics
- Medical and laboratory technology
- Wellness
- Health Care
- Automation
- Measurement and control engineering

The top part has a recessed area to protect membrane keypads or product labels. There is sufficient space here for operating elements, switches or displays.

Included in the range of accessories: system for concealed wall mounting as well as an enclosure canting kit – in landscape format – to allow an ergonomically favourable reading angle of 12 degrees.

The SMART-TERMINAL is a robust, sealed enclosure. The round-cord seal required for this is included with the basic enclosure.

On request, the seals and covers can be produced in other colours to create an individual design (200 units or more).
